

Since 2003, Kanoë the Kazoo has introduced 1,000 area citizens and decision makers to the beauty and recreational opportunities provided by the Kalamazoo River and its tributary streams and lakes.

Over fifteen organizations are offering floats on various stretches of the Kalamazoo River, its tributaries and lakes within the watershed.

Participants need to

- Furnish their own canoe or kayak, paddles, paddle partner, and life vests. (Some floats may have rentals, call to verify)
- Bring a sack lunch and something to drink.

Other possible items to bring

- camera/binoculars in waterproof container
- cell phone
- extra water
- sunscreen and hat
- rain gear
- bug repellent
- please, no alcohol

Educational and informational displays, speakers and demonstrations will be available to help you better understand and appreciate the land, water and human resources of your watershed.

Reservations are required

All of the trips are designed for fun and discovery, but also include some instruction on the ecology of the river, streams, lakes and wetlands, riparian values and watershed management.

Kanoë The Kazoo intends to

- celebrate the watershed
- rediscover this valuable regional resource
- educate decision makers
- educate the general public
- promote public use and stewardship of the watershed
- discuss publicly the future of the river and watershed
