

CEDAR LAKE WATERSHED MANAGEMENT PLAN (2008-2009)

The following tasks will be completed to develop a comprehensive Watershed Management Plan (WMP) per State of Michigan WMP requirements. These efforts will follow a Steering Committee driven process and build upon existing data for this watershed, and efforts and actions of WMPs in adjoining areas (e.g. [Pine Lake/Van Etten Lake Watershed](#)).

1. Drainage Basin Characterization
2. Designated/Desired Uses and Water Resource Narrative
3. Impairments, Threats, Pollutant Sources, and Affected Watershed UseS
4. Quantification, Prioritization, Critical Area Identification, and Links to Designated Uses and Preliminary Goals
5. Improvement Goals, Load Reductions, Methods of Evaluation
6. Implementation Strategy
7. Cost Estimates
8. Public Involvement
9. Implementation Schedule
10. Monitoring Progress
11. Watershed Management Plan Development/MDEQ Review
