

Table 7 - Implementation Plan Elements and Draft Schedule for Municipal Storm Water

Plan Elements	NPS Category Elements	Target/ Milestone	Completion Dates
1. stakeholders	All Phase II communities in the Kalamazoo Watershed	Encourage nonregulated communities to participate	2002 & ongoing
2. regulations	-Federal Clean Water Act, Phase II Storm Water Regulations -All regulated communities in urban areas must submit apply for coverage		In effect March 2003
3. goals	All communities that must be regulated, as well as those that choose coverage, shall have effective municipal storm water reduction/improvement programs	Reduction of P via effective municipal storm water programs	2001 and ongoing
4a. ongoing efforts	-Communities who have already received permit coverage and have begun implementing programs: - City of Battle Creek - Calhoun County - City of Springfield - City of Portage - Western Michigan University -Efforts involving development of permit applications/municipal storm water programs: - Kalamazoo Area Storm water Working Group (cities, townships, county entities) - Battle Creek Area townships - City of Allegan		
4b. recommendations	-Encourage the watershed approach to municipal storm water management. -Encourage the targeting of phosphorus reductions in municipal storm water programs -Encourage communities who are not automatically regulated to participate in the municipal storm water programs	Effective reduction of p through municipal storm water programs	Now and ongoing
5. funding resources	-Local funding -Some CMI funding	Leverage local resources	
6. program resources	Cities, townships, counties, State, Federal and corporate		
7. cost optimization	Share resources across governmental jurisdictions		

8. data gaps			
9. accountability structure	-Regulatory NPDES program administered by MDEQ -TMDL Implementation Committee		
10. reporting	-Permittees provide annual report to MDEQ. Copies of these reports could be provided to Implementation Committee. However, these reports will not necessarily include P-reduction estimates.	Summaries of municipal storm water activities to Implementation Committee; provided by Implementation Committee at TMDL annual meeting	annually
11. timeline	Ongoing		
12. tracking	-Will need to develop mechanism (MSU) to obtain P-reduction estimates for TMDL tracking system	P-reduction estimates in TMDL tracking system	2002/2003 and ongoing
13. monitoring	-Some will be done within individual municipal storm water programs		
14. contingency plan	-TMDL Implementation Plan of revised TMDL could identify non-regulated communities for regulation if necessary -Fees for discharges based upon volume and/or characteristics	Include non-automatically designated communities under Phase II, IF NECESSARY	If needed
15. updating strategy	-By Implementation Committee, as needed	Updated strategy	As needed
