ACKNOWLEDGEMENTS	IV
SECTION 1.0 Overview of the TMDL Process	1
1.1 Public Participation	4
1.2 The “Cooperative Agreement”	5
1.3 The Kalamazoo River/Lake Allegan Setting	6
1.4 Historic Kalamazoo River Water Quality Conditions	8
1.5 Phosphorus as the Pollutant of Concern	9
1.6 Rationale for Addressing Phosphorus Loading	10
1.7 Water Quality Improvement Goals	10
1.8 Total Phosphorus Loading to the Kalamazoo River/Lake Allegan Watershed	11
1.9 Non-point Source Loads to the Kalamazoo River/Lake Allegan Watershed	13
1.10 TMDL Loading Capacity	14
1.11 Wasteload Allocation (Point Source Discharges)	14
1.12 Load Allocation (Non-point Source Discharges)	14
1.13 Margin of Safety	15
SECTION 2.0 TMDL IMPLEMENTATION PLAN	16
2.1 Overview	16
2.2 Process/Progress to Date	17
2.2.1 Public Involvement, Committees and Subcommittees	17
2.2.2 Point Sources	18
2.2.3 Non-point source reduction efforts	18
2.2.4 Website development for public access	19
2.3 Implementation Actions/Management Measures	19
2.4 Timeline	19
2.5 Reasonable assurances	21
2.5.1 Point Sources	21
2.5.2 Non-point Sources	21
2.5.3 Water Quality (Phosphorus) Trading	22
2.5.4 Technical Support	22
2.5.5 TMDL Leadership Structure	23
2.6 Legal or Regulatory Controls	24
2.7 Time Required to Attain Water Quality Standards	25
2.8 Monitoring Plan	25
2.9 Milestones for Attaining Water Quality Standards	26
2.10 TMDL Revision Procedures	26
2.11 Tracking Implementation	27

2.11.1	Point Source Tracking System	27
2.11.2	Non-point Source GIS Tracking and Monitoring Plan	28
2.13	Public Involvement	29
2.13	Program Sustainability	30
2.14	In-lake/Instream Additional Sampling	31
2.15	Education/Outreach	33

SECTION 3.0 IMPLEMENTATION STRATEGIES 35

3.1	Point Source Plan	36
3.2	Non-point Source Plans	39
3.2.1	Municipal Stormwater	39
3.2.2	Industrial Stormwater	40
3.2.3	Land Use and Development	41
3.2.4	Greenhouses	43
3.2.5	Agriculture	44
3.2.6	Transportation	46
3.2.7	Construction	49
3.2.8	Turf Grass and Alternative Landscaping	51
3.2.9	Septic Systems and On-Site Wastewater Treatment Systems	53
3.3	In-lake/Instream Sources	55
3.4	Sub-basin Planning	57
3.5	Cross-Cut Analysis of Reduction Strategies	58

SECTION 4.0 REFERENCES 60

ATTACHMENTS

- A. Summary of Pubic Meeting Dates for the Kalamazoo River/Lake Allegan Watershed TMDL and Implementation Plan Development and List of Participants
- B. Kalamazoo River/Lake Allegan Watershed Cooperative Agreement for the Reduction of Phosphorus Loading and list of Signatories
- C. Water Quality Pollution Reduction Programs in the Lake Allegan Basin
- D. MSUE Non-point Source Tracking Information and Tables 1 – 4
- E. Analysis for Internal Phosphorus Loading in Lake Allegan
- F. Sample Watershed Logo Used by the City of Battle Creek and the Portage/Arcadia Creeks Watershed Management Project
- G. Summary of Agricultural Participant Meetings

List of Tables

1. Existing Conditions and Water Quality Goals for Lake Allegan.	3
2. Kalamazoo River/Lake Allegan Loading Allocations and Margin of Safety for the Early and Late Growing Seasons.	4
3. Kalamazoo River/Lake Allegan and Subwatershed Land Use Cover.	
4. MDEQ Estimated Phosphorus Loads to Lake Allegan in the Baseline Year 1998.	12
5. Estimated Non-point Source Phosphorus Loads to the Kalamazoo River and Lake Allegan.	
6. Point Source Implementation Plan Elements and Schedule.	
7. Implementation Plan Elements and Schedule for Municipal Storm Water.	
8. Implementation Plan Elements and Schedule for Industrial Storm Water.	
9. Land Use – Management Implementation Plan Elements and Schedule.	
10. Greenhouse Nutrient Management Implementation Plan Elements and Schedule.	
11. Implementation Plan Elements and Schedule for Agriculture.	
12. Transportation Management Implementation Plan Elements and Schedule.	
13. Construction Implementation Plan Elements.	
14. Turf Grass and Alternative Landscaping Implementation Plan Elements and Schedule.	
15. Septic System Management Implementation Plan Elements and Schedule.	
16. In-lake/Instream Processes Implementation Plan Elements.	
17. Implementation Plan Elements and Schedule for Sub-basin Management.	
18. Cross-cut Analysis of Implementation Plan Strategies for Point and Non-points Sources.	

List of Figures

1. Kalamazoo River Watershed and Subwatersheds Upstream of and including Lake Allegan.	
2. Topography of the Kalamazoo River/Lake Allegan Watershed.	
3. Land Use Cover (1999) in the Kalamazoo River/Lake Allegan Watershed.	
4. Agricultural Land Cover in the Kalamazoo River/Lake Allegan Watershed.	
5. Forest and Open Land Cover in the Kalamazoo River/Lake Allegan Watershed.	
6. Wetlands and Open Water in the Kalamazoo River/Lake Allegan Watershed.	
7. Land Cover with Impervious Surfaces in the Kalamazoo River/Lake Allegan Watershed.	
8. Urbanized Land Cover in the Kalamazoo River/Lake Allegan Watershed.	
9. Lake Allegan in the Lower Kalamazoo River.	
10. Land Cover Distributions and Relative Non-point Source Total Phosphorus Loads to the Kalamazoo River and Lake Allegan.	
11. Kalamazoo River/Lake Allegan TMDL Implementation Framework.	
12. Organizational Structure for Implementation of the Kalamazoo River/Lake Allegan TMDL.	

ACKNOWLEDGEMENTS

This Kalamazoo River/Lake Allegan TMDL Implementation Plan represents a multi-year effort by numerous organizations, municipalities, industries, agencies, institutions and citizens of the watershed to develop a water quality strategy addressing issues related to phosphorus inputs to the river. The plan was collectively developed by participants contributing thousands of hours of time and energy to ensure that strategic elements reflect the social, political and scientific feasibility of accomplishing community-established and USEPA-approved water quality goals.

Several participants of this overall process contributed significantly to the writing of this document. These individuals and affiliations include:

- Ms. Jenny Molloy, Environmental Quality Analyst, Michigan Department of Environmental Quality – Surface Water Quality Division (MDEQ-SWQD), Kalamazoo District Office, Kalamazoo, MI
- Ms. Sylvia Heaton, Aquatic Biologist, MDEQ-SWQD, Great Lakes and Environmental Assessment Section, Lansing, MI
- Mr. Doug Carter, District Water Quality Agent, Michigan State University Extension Service, W.K. Kellogg Biological Station, Hickory Corners, MI
- Mr. Mark Kieser, Senior Scientist, and Mr. Michael Tenenbaum, Technical Services Manager, Kieser & Associates, Kalamazoo, MI

Thanks to a \$12,000 grant from the Kalamazoo Community Foundation’s “Catch the Spirit Fund” through The Forum of Greater Kalamazoo, partial support was provided to Kieser & Associates (K&A) to compile this plan on behalf of the TMDL Implementation Committee with the majority of K&A efforts provided as in-kind services. Section 319 funds also supported these efforts. U.S. EPA funding was available for the Great Lakes and Environmental Assessment Section of the MDEQ. Hundreds of volunteer hours from other TMDL participants representing a broad array of organizations, agencies and individuals provided the impetus for the successful compilation of this document.

This Implementation Plan was drafted with the intention to provide a flexible basis to obtain phosphorus reduction goals by 2012. This is in anticipation that Lake Allegan water quality goals for improved clarity, nuisance algal bloom elimination, dissolved oxygen criteria compliance and a balanced fishery can be achieved by 2015 (assuming a projected three-year system response to target load reductions). The implementation strategy also includes what the watershed community believes are the necessary milestones, incentives and enforcement mechanisms to achieve these water quality improvements required by the Clean Water Act.

To date, the development of this plan has been an engaging and successful process whereby several planning and implementation milestones were achieved during the formulation of this plan. The watershed cooperation and desire to meet these Kalamazoo River/Lake Allegan goals have been and will continue to be sustaining aspects of these long-term efforts to improve and protect this natural resource.
